Find total salary of marketing team of north region  
Sumifs is used to calculate the total salary of employees who meet multiple condition

Syntax :- =SUMIFS( sum - range, Criteria - range1, Criteria1, [Criteria - range2, Criteria2]... )

Eg :- =SUMIFS(G2:G21, F2:F21, F12, E2:E21, "N")

Result:- 15750

Calculate the average of employees who are earning more than 10k in training department

Calculates the average salary of employees using AVERAGEIFS

Syntax :- =AVERAGEIFS( average - range, Criteria - range1, Criteria1, [Criteria - range2, Criteria2]... )

Eg:- AVERAGEIFS (G2:G21, F2:F21, F14, G2:G21, 10000)  
Result:- 10,000

How many employees working from jaynagar in marketing dept in south

uses COUNTIFS for multiple conditions  
Syntax = COUNTIFS (Criteria - range1, Criteria1, [Criteria - range 2, Criteria 2].....)

Eg:- = COUNTIFS (C2:C21, C12, F2:F21, F12, E2:E21, E13)

Result:- 1

logical functions

DA 8% of basic

→ Dearness allowance at 8% of basic salary means calculating 8% of an employee's basic salary as their DA

Syntax :- = Basic salary \* 8%

Eg:- If Basic = ₹20,000

DA = ₹20,000 \* 8% = ₹1,600

HRA 12% of basic with DA

House rent allowance at 12% of basic salary with DA means calculating 12% of the basic salary + DA

Syntax:- (Basic + DA) \* 12%

Eg:- (20,000 + 1600) \* 12%

Result:- 2592

Travelling allowance of 4k in marketing dept.

→ we use absolute reference to compare the job role in dept and fix the marketing dept

Syntax := IF(F2 = \$F\$4, 4000, 0)

Result :- 4000

Incentive of 5k either bangalore city or operation dept employee

→ we use or operator with if function to satisfy the condition

Syntax := IF(OR(logical1, [logical2], [logical3]...))

Eg := IF(OR(D2 = \$D\$12, F2 = \$F\$18), 5000, 0)

Result :- 0

PF 15% of basic

→ personal allowance is calculated as 15% of basic

Syntax :- basic \* 15%

Eg := A2 \* 15%

If basic = 20000

Result := 20000 \* 15% = 3000
